

Fort Manifesto

2024 ®

✓ What is Fort about?

Fort is building a tight-knit ecosystem around the TON community.

Our goal is to reward all the contributors through giveaways, contests, ambassador programs, meme events, and much, much more.

We have big plans for the project, including, but not limited to:

- Distribution of a large portion of the total \$FORT token supply
- Collections of NFTs with perks for holders
- Airdrops and rewards for the most active members of the community
- Partnerships with other projects on the TON network (and even beyond)
- Events, giveaways and contests to fairly reward the newcomers

But this is not where it all ends - time will show what other utilities YOU give your favorite project.

✓ What's the \$FORT token for?

The main purpose of the token is to reward the contributors, holders of the NFTs, and enthusiasts of the community. Further utilities will be later determined.

The allocation of the token is planned as so:

- 5% \$FORT initial supply

This amount of tokens will be mostly offered to the community for free through giveaways, contests, and contribution programs. After this phase ends, we will be left with 1,000,000 \$FORT tokens as the total supply plus the tokens already distributed to the early participants. We believe in the power of the community, and we believe being early matters. However, some of those tokens might also be used for fees and expenses if it's needed.

- 39% Dex Listing paired with NFT presale

400,000 \$FORT tokens will be paired with the presale profit from an extremely rare NFT collection that will be available on the GetGems platform. The liquidity will be locked once added. The holders of the NFT will receive LIFELONG benefits as long as they keep holding rather than selling the passports. Of course, before the open sale, you will have a chance to get whitelisted for a lower sale price. More info on this and the whole NFT thing will be announced later on, when the NFTs are ready to be published.

- 22% Community rewards and airdrops

\$FORT has a vision - community is the most important aspect of a... well, community token! Continuous airdrops and tons of rewards will be provided to the community through all kinds of activities, including but not limited to holding the passport NFTs. That would be 230,000 tokens.

- 14% Gradual burn

150,000 \$FORT tokens will be burned slowly and over time, so that we're left with a scarce supply of about 850,000 \$FORT. This will, presumably, drive the demand, and therefore the value, higher and higher.

- 14% Marketing

We will use 150,000 of the \$FORT tokens for marketing and proposals. We will reach out to ambassadors, media, and the most active members of the community to spread the word... Which means you might have a chance to get a web3 job with Fort as well, how cool is that?!

- 6% Founding Team

70,000 \$FORT tokens will be kept in the custody of the dev and the team. Majority of the tokens will be locked, and the rest will be used for fees and expenses of maintaining the growth of the project.

✓ Who are we?

An anonymous lover of the TON chain and community, a one-man team.

But I'm not alone, because we are together :)

Instead of hand-picking the "higher-ups", every subscriber has the chance to be part of the Fort team. OGs, CMs, ambassadors and mods will all have their own programs to both contribute and get back from the fortress of our dreams.

✓ What's the deal with the Crown NFTs?

The Crown NFT is a super rare collection on GetGems. It gives the holders benefits through the entire Fort ecosystem. Here's a bunch of info to clear up the function and the purpose:

Main Attributes:

- Purpose: Fundraising for the \$FORT initial liquidity provision & Long-term benefits and airdrops to the holders
- Max Supply: 21
- Price (dynamically increasing with every buy): 10 > 12 > 14 > 16 > 18 > 20 > 22 > 24 > 26 > 28 > 30 > 32 > 34 > 36 > 38 > 40 \$TON

Holder Benefits:

1. 512 \$FORT tokens will be transferred to the first, original buyers of each individual NFT. Secondary buyers will not receive any \$FORT.
2. A snapshot will be taken of the NFT holder addresses 30th of every month:
 - All of the holders will receive a monthly allowance of 96 \$FORT (subject to change after token price goes live)
 - Holders will have perks, benefits, rewards and airdrops from new events that will be introduced later. They will have discounts, WLs, and free drops

throughout the entire Fort ecosystem that we will be building.

✓ **Wen?**

Very, very soon.

You're [early](#).
